

Tap Timer

- 1 station
- 1 independent program
- 24 starts per program
- 3/4" threaded female connection

The Tap Timer battery-powered single-station electromechanical controller can be installed on terraces and balconies without needing any special accessories, since it is equipped with a built-in solenoid valve that can be connected straight to a normal tap. The programming is easy and intuitive since the irrigation management can take place based on two parameters: irrigation frequency and duration.

Features

- Irrigation duration from 0 to 120 minutes
- Irrigation programming: from 1 hour to 1 week (with On/Off button)
- Flat battery indicator

Specifications

- Power supply: two 1,5V alkaline batteries
- Recommended water pressure: from 1,0 to 8,0 bar

Codification
