

Chrysal OVB

Description

Chrysal OVB is a hydrating solution for summer flowers.

General

Chrysal OVB is a hydrating solution for Gypsophila and other summer flowers. It stimulates water uptake by the flower. This will encourage the flowers to open and stay fresher for longer.

Sugar can be added to Chrysal OVB to encourage immature buds to flower. It improves the colour and size of the flowers. Chrysal OVB is recommended for use in nurseries and at flower auctions.

Effects

- Stimulates water uptake
- Improves the quality of flowers and leaves

Packaging & Dosing

Available in 5 litre drum. For an optimal treatment dose 3ml per litre of water.
